

Growth Hormone Restoration: Sermorelin Acetate

Overview

- Improves body composition
- Increases lean tissue
- Decreases body fat
- Improves sleep
- Enhances mood

Sermorelin is a member of the Growth Hormone-Releasing Hormone (GHRH) analogue drug class. Sermorelin can significantly promote the release of Growth Hormone, as well as improve GH serum concentrations and insulin-like growth factor 1 (IGF-1).

Sermorelin is commonly prescribed for the treatment of Adult Growth Hormone Deficiency (AGHD). It's also used for other medical issues such as low natural GH production.

Combination Therapies for GH Release/Body Composition

- GLP-1/GIP agonists like Semaglutide, Tirzepatide, or Liraglutide
