

## Peptides: Sermorelin

### Overview:

- Body composition
- Increase lean tissue
- Decreases body fat
- Improves sleep
- Mood enhancement

Sermorelin is categorized as a member of the growth hormone-releasing hormone (GHRH) analogue drug class. Sermorelin can significantly promote the release of growth hormone, as well as improve GH serum concentrations and insulin-like growth factor 1 (IGF-1). This is commonly prescribed for the treatment of Adult Growth Hormone Deficiency (AGHD), while it's also used for other medical issues such as low natural GH production.

### Combination Therapies for GH Release/Body Composition

- Ipamorelin
- Ibutamoren
- Oxandrolone
- Metformin

**Suggested Dose:** Inject 500 mcg-1000 mcg at night before bed

Sermorelin can be administered in 12-week cycles with a holiday of 30 days if IGF-1 levels decrease after initial treatment.

Sermorelin	Strength	SKU	Price	Pharmacy
	3 mg	616-aps-3	\$ 72	APS
	6 mg	616-emp	\$ 110	Empower
	9 mg	616-emp/aps-9	\$ 130	APS and Empower
	15 mg	017	\$ 165	APS, Hallandale and Empower

**NOTE:** We are unable to apply any discounts for peptides.

## States where pharmacies DO NOT ship

Pharmacies are unable to ship to patients in the states below

### **APS**

California (CA) {Peptides cannot be shipped}  
Hawaii (HI)  
Nebraska (NE)  
North Carolina (NC)

### **Empower**

Idaho (ID)

### **Hallandale**

Alabama (AL)	Arkansas (AR)
California (CA)	Hawaii (HI)
Indiana (IN)	Michigan (MI)
Minnesota (MN)	Nebraska (NE){Non-sterile only}
New Jersey (NJ)	

**NOTE: We are unable to apply any discounts for peptides.**
